

Here's what parents had to say:

“I loved the book. It kept my daughter’s brain thinking instead of just playing.”

“I thought it was great practice and preparation for the next grade!”

“My son was very excited about completing each of the activities!”

“It gave me step-by-step guidance for how to help my son.”

“I believe the time my children spent using the book over the summer was well worth it.”

“It really helps us parents—plus, it keeps the kids busy and learning.”
