

STRUCTURAL DIAGRAMS

Diagram Type	Definition	Example
Venn	A Venn diagram uses circles to designate and represent data sets and their relationship to each other. Venn diagrams are used to compare and contrast data.	
Pyramid	Pyramid diagrams are mostly used to depict and relate data that is hierarchical. A common elementary pyramid diagram is the food web energy pyramid.	
Web	Web diagrams visually represent relationships between concepts, actions, or things through the interplay of words, shapes, connectors, and other visual elements.	
Tree	A tree diagram has branching connecting lines that represent different relationships and processes.	
Tables	Table diagrams organize and display facts or figures in columns and rows.
