

# Buying the Ingredients

On the day before the bake sale, Grandpa arrived at my house early in the morning.

“Let’s go to the market, Corey,” he said. “We need to buy the ingredients.”

I had decided to use \$20.00 of my savings toward the ingredients. But I was worried it might not be enough.

“Don’t worry,” said Grandpa. “I’ll lend you some money. I’m happy to help.”

Grandpa gave me \$30.00. We went to the store. It took a while, but we found all the ingredients we needed. And we had \$15.00 left. I gave that \$15.00 back to Grandpa.

# Back at Home

It was time to start baking. “I think we can make 3 batches fairly easily,” Grandpa said. “Clear the counters and the tabletop. We’ve got work to do.”

First, Grandpa turned on the oven to warm it up. Then I measured the ingredients. I mixed them together in a bowl for the first batch.

## How Many is a Dozen?

A dozen means 12. Eggs are usually sold by the dozen or half-dozen (6 eggs).

## LET'S EXPLORE MATH

Corey and Grandpa are making 48 muffins at a time. Write at least 2 **multiplication** equations and at least 2 **division** equations using these numbers: 4, 6, 24, 48.
